

Neolact MMF[®]

(Mother's Milk Factor)

The ONLY 100% Human milk - derived fortifier

**One sachet to be added in 25ml
of mother's milk/ PHBM 70 Cal**

When added to mother's milk,
Neolact MMF increases
the protein content thus providing
safer and optimal growth

Premature babies' nutritional requirements are higher as compared to normal babies

For babies who arrive early (premature babies), there is a need to help them 'catch - up' on growth, by boosting (fortifying) nutritional value of mother's milk

Mother's milk protein content
1.6 gm Per 100 ml

Protein need of premature baby
3.2 - 4.1 gm

Did you Know?

The term "Human Milk Fortifier (HMF) is a generic name for a nutritional supplement that is added to mother's milk or donor milk to meet the dietary needs of premature babies in the neonatal intensive care unit (NICU). It is frequently assumed that because it is "Human Milk Fortifier" it must be made from human milk, which is not true.
